

Average length of ICU stay in MIMIC-III

tom pollard

10/10/2017

This is an RMarkdown document that demonstrates a reproducible analysis using MIMIC-III (version 1.4). Let's calculate the mean length of stay in the ICU and then include this value in our document.

So the mean length of stay in the ICU is 4.9179716 days. Rounded to two days, this is 4.92 days. We can plot the distribution of length of stay using the qplot function:
