Plotting a CONSORT Flow Diagram

CONSORT Flow Diagrams can be used to plot the flow of data selection of a patient cohort.
For more details, see: http://www.consort-statement.org/consort-statement/flow-diagram

All patients in MIMIC–III
n = 58,976

Exclude patients of age < 18
n = 8,180

Exclude patients with no ICU admissions
n = 1,071

Exclude patients with diabetes
n = 1,324

Exclude patients with sepsis
n = 4,804

Study cohort
n = 43,597
